NOJA Power Proudly Sponsoring EECON 2018

Connected Futures – The Power of Working Together

Australian Switchgear Manufacturer NOJA Power are pleased to announce their platinum tier sponsorship of the Australian Electrical Engineering Conference (EECON) 2018 in their home city of Brisbane on 5th and 6th of April.

EECON is the premier Australian conference for Power Systems professionals, providing an excellent forum and networking opportunity to solve the challenges of the modern distribution grid. NOJA Power will be offering support for this event, as well as hosting a NOJA Power Factory Tour to conference delegates, showcasing the manufacturing process of their OSM Recloser and VISI-SWITCH Products.

EECON 2018 conference is featuring NOJA Power's VISI-SWITCH trailer centre stage in the exhibitor's hall

EECON 2018 will bring Power Industry Leaders to Brisbane to share the rapid developments impacting electricity participants from market operators through to customers. This conference continues the discussion from EECON 2017 in Melbourne and examines industry and customer developments in adopting and integrating technologies to deliver sustainable, affordable and reliable energy. The need for all segments of the industry to work together to deliver these outcomes for the benefit of all stakeholders will be explored.

The EECON 2018 event in Brisbane coincides with the [Gold Coast Commonwealth Games](#), offering an exciting opportunity for travelling delegates to join the festivities on the Gold Coast before or after the event. With public transport available from Brisbane to the Gold Coast, a few days spectating at the games is no logistic challenge.

“Connected Futures – the Power of Working Together” is the theme of EECON 2018. This theme greatly reflects NOJA Power’s commitment to working together with utilities and private industry to solve electrical engineering challenges.

“EECON is developing into the premium event for the Electricity Industry in Australia and NOJA Power are proud to support EECON and the Australian Electricity Distribution Utility Industry with this sponsorship,” says NOJA Power Group Managing Director Neil O’Sullivan. “The factory tour will be a unique opportunity for delegates to see modern electrical switchgear manufacturing.”

To register for EECON 2018, please go to the following link. NOJA Power are looking forward to seeing you at EECON 2018, as they look to solve electrical engineering and switchgear challenges around the world.
